IS810N – advanced multi-axes servo platform

Dynamic performance with ultra-fast current loop

IS810N's 4.5 kHz current loop bandwidth allows the motor to follow the motion profile with minimal error.

The drive has achieved perfect synchronization and higher stability by eliminating all delay between the speed loop and current loop.

The result is radically improved system performance with a shorter settling time and higher throughput. In case of mechanical resonance, high performance can be ensured through use of notch filters (up to four notch filters are available for simultaneous use if necessary).

Speed and position loop cycle time: 62.5 μ s

4 times faster than previous generation products

Matches with 23 bit absolute encoder

Equivalent resolution of 0.15 arc seconds

Current loop cycle time: 1.6 μ s

3 kHz speed loop bandwidth

IS810N – advanced multi-axes servo platform

Complete EtherCAT functionality

The EtherCAT CiA Drive Profile 402 contains all seven motion profiles. Additionally, the SYNC object enables precise operation of the EtherCAT distributed clock to allow perfect synchronisation between drives. Meanwhile, a dedicated Ethernet port with a Modbus TCP/IP protocol allows efficient servicing and commissioning through the InoDriverShop PC tool.

Please note: a CANopen slave protocol is supported by the IS810P variant

Easy commissioning with smart tuning functions

Machine performance can be optimized by using IS810N's automatic gain function to set the stiffness level to achieve fast response and stability.

- Online and offline load inertia identification
- Automatically adjust speed and position loop gains by setting the stiffness level
- Automated detection of vibration frequency allows notch filter to be automatically set
- Damping filter suppresses vibrations with a characteristic frequency of 1-100 Hz

Remote service and maintenance

An Ethernet port with Modbus TCP/IP protocol is available for commissioning, remote monitoring, diagnostics and maintenance.

Seven CiA 402 motion profiles are supported
