

Product Overview

Our timer uses chip control to automatically turn power on or off at set times. It has a standard industrial interface for easy connection with solenoid valves and improved protection. Common applications include waste discharge from tanks, garden and lawn irrigation, aquarium aeration and filtration, and fountain control.

Product Type		XY-11	Outside View	
Input	Voltage	24~240V AC/DC-50Hz/60Hz		
	Power	4mA max.		
Output	Form	MOS output		
	Model	Power on first, then off.		
	Current	1A max.		
Time setting	ON	2s		
	OFF	1min~120min		
Ambient temperature		-10°C~+50°C		
IP Grade		IP65 (Proper installation)		
Indicators		Red LED		
Manual override		Test		
Connection		Industrial Form B
